#### DETAILED ACTION

## Response to Arguments

- 1. Applicant's arguments with respect to new claims 21-42 filed 6/23/2004 have been considered but new issues have been found regarding subject matters belonging to the non-elected species. The Applicant has elected species I corresponding to Figures 8A-10 in paper No. 5, received 12/11/2003 without traverse in response to the Office Action mailed 11/14/2003. However, the new claims 24, 25, 27, 29, 35, 36, 38 & 40 contain subject matters that belong to non-elected species. Therefore, these claims are withdrawn from consideration, and only claims of subject matters of the elected species I corresponding to Figures 8A 10 are considered on merits in this Office Action.
- 2. Applicant's arguments with respect to claims 21-23, 26, 28, 31-34, 37, 39 & 42 have been considered but are most in view of the new ground of rejection.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 2615

3. Claims 21-23, 26, 28, 31-34, 37, 39 & 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takashima et al (US 5,796,366) in view of Hibi (US 5,859,665).

Regarding claim 21, Takashima discloses a portable image pickup apparatus (a video camera shown in Fig. 1) comprising:

an apparatus proper (camera and lens body) comprising an image pickup lens (inside lens barrel 14) and a band attaching unit for connecting a band that is used to wear the apparatus proper on a user's body (see Fig. 1; col. 4, lines 10-14);

an attachment (46) removably attached to the apparatus proper, the attachment comprising a second lens (46) that is placed in front of the image pickup lens so as to align with the image pickup lens for fulfilling a special optical effect adding function (to eliminate image blurring). See Fig. 1 and col. 6, lines 19-25.

Takashima fails to explicitly disclose that the attachment comprises at least one hook that is engaged with the apparatus proper for fixing the attachment to the apparatus proper.

Hibi teaches an image stabilizer (30) that is removably attached in front of an image pickup lens (Figs. 3 & 5; col. 1, lines 7-11), wherein at least one hook (70) is formed with the image stabilizer for fixing the stabilizer to the lens device. See col. 4, lines 29-34 and col. 5, lines 38-50.

Therefore, it would have been obvious to one of ordinary skill in the art to provide a hook structure as taught by Hibi to the attachment in Takashima for securing the attachment into the video camera in a well known fashion.

Art Unit: 2615

Regarding claim 22, it is also clear in Hibi that the hook is provided on the outer periphery of the apparatus proper (see the stabilizer when it is mounted on the lens device as shown in Fig. 5).

Regarding claim 23, Hibi also shows that the hook is fixed to the stabilizer (Figs. 3 & 5).

Regarding claim 26, inherently disclosed in Hibi is the stabilizer having its hole as an opening end to engage with the periphery (81) of the lens device as shown in Fig. 5.

Regarding claim 28, see the analysis of claim 21, wherein a special optical effect is to eliminate image blurring caused by camera shaking.

Regarding claim 31, apparently shown by Takashima in Fig. 1, the apparatus proper includes a pair of band attaching units each provided at a respective one of opposite ends thereof for attaching the wristbands thereto.

Regarding claims 32-34, see the analyses of claims 21-23, respectively.

Regarding claims 37, 39 & 42, see the analyses of claims 26, 28 & 31, respectively.

Art Unit: 2615

## Allowable Subject Matter

4. Claims 30 & 41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claims and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior arts of record fails to teach or fairly suggest the limitations required in either claim 30 or 41 for the attachment that covers the display unit in addition to the image pickup lens.

#### Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2615

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nhan T. Tran whose telephone number is (703) 605-4246. The examiner can normally be reached on Monday - Thursday, 8:00am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew B Christensen can be reached on (703) 308-9644. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
